

**Do not wait for leaders.  
Ride alone. And they will see  
we ride together.**

---

The idea behind Unite Bike is simple. It is about promoting and supporting a community of individual people who make the choice everyday to participate in an activity that is good for their health, good for the environment, and helps create a better society at large.

As a group of thoughtful, committed individual riders lets band together to Unite... Bike... and take a group photo to show the world what it means to make things better two wheels at a time. Let us join together to celebrate and confirm our humanity.
